

The Rebel Speaks

GOVERNMENT ANTAGONIST AND HUGENOT

Well People are laughing about Newt's idea to build on the moon! Publicly mocking him because he has vision! Oh, ye of tiny minds... why not? We know how to get there! We've been there before! We built the space shuttle, which the space programs of all the other countries depended on! Our NASA space programs have given us everything we have today. It's no big deal... just takes a little "Star Trek"® imagination and some good engineering.

Just think of all the jobs that were created by our space endeavors and all that can be in our future endeavors! We're not afraid to try, are we? It's time to claim that piece of rock out there before the Chinese or the Ruskies! After all, our flag is and has been the only flag planted there (on the moon), besides, we have equipment stored there already! We left a land rover and a dozen or more artifacts that belong to us. Going there and staying for extended periods is not any more fathomable than the international space station now in orbit over our heads!

You know the Democrats are a party of "you can't." On the other hand, Republicans are the party of "I can." The problem is, Republicans can't seem to get on one side. I remember watching our landing on the moon the first time—all eyes on this world watched in total awe! I watched the space shuttle Enterprise take off from Tulsa International Airport; it flew directly over me. The sight was immense. My heart almost skipped a beat when Chuck Yeager went zipping past in one of the escort planes. It was "Star Trek"® come true.

So, what's the matter? Seen too many space bug movies? Scared? We still lead the world in space experience. I've said this before: There is no such thing in my vocabulary as "I can't!" Only pick yourself up and keep going. If you feel pain then you are still alive. Stand and fight! It is time to decide whether the Republican party and our

country survives. The moon will be developed whether we like it or not, and in this century. Why not be the first, regardless of who is president?

We need people with vision. We need those willing to take risks to achieve! We need winners! We don't need four more years of Obama-pie and the leaches he has set loose on our society! We have all been exposed to Star Wars® and Star Trek® for years. Why not take the baby step and do it?

"The Moon or Bust!"

I'm an American! "I can do!" How about you?

Did you know?

This country's Founding Fathers set up the 2 U.S. Senators from each state to be selected by each state's assembly. This took campaigning out of their selection and the reason the Founding Fathers did it was so that it was very difficult to "buy" a Senator, because they were not elected. If you can't buy a Senator, then it makes it all the more difficult to buy a House of Representatives member... or the President.

This meant that the state legislatures actually ran the U.S. Senate and gave the states' the ability to have a system of checks and balances against the power of Congress and the Federal Government.

The 17th Amendment instituted the general election of Senators by popular vote in 1913. It terminated the state legislatures' role in Washington, D.C. and greatly increased the power of the Federal Government. The 17th Amendment has provided us with the immoral, corrupt Congress that we have today.

Repeal the 17th Amendment and take back our nation!

See you on the bridge!

P.S. So, how are those of you doing who got the free car and house Mr. Obama-pie gave you out of his stash?

Letters to The Rebel

Do you have a comment or response to The Rebel? Do you have a suggestion for a future news-letter? Do you have a strong opinion about some current affair that you want to speak out about?
