

The Rebel Speaks

GOVERNMENT ANTAGONIST AND HUGENOT

Well, I hate to be right, but I told you so! \$5.00 a gallon! Great galloping ghost! Or should I say, small loping pony? The highest gas prices in the history of our country! Can't afford for the horse to break stride. One more great accomplishment for Der Führer. Let me see, some of this man's great works are: 46 million now living below or at the poverty line; 26 million out of work; the theft of America's entire gross national product!

The moratorium on drilling in our own country, the destruction of the main stream if the free market; the humiliation of our country in an attempt to bond with every socialist country in the world, in order to hand us over to our enemies without a shot! These are just a few of the abominations Mr. Obama pie and his Chicago gangsters have reeked on us, with new ones every day. "Oh, yea," remember the guns they gave the drug people in Mexico that have already killed Americans? And while Mr. Obama pie vacations every few weeks on our check book, he says that we have to give more. Why? Isn't a \$50 million vacation and \$14 trillion enough?

"Oh, yea," he says he is going to cut a trillion of his spending efforts. I'm a daisy if he does! You can't keep political power if you don't spend. What he means is he just won't spend it on what it was intended; instead, he will raise taxes and blow that trillion on more vacations! Well, that's redistribution as he would call it. He will simply steal it! Slight of hand, if you will... smoke and mirrors. Where did that trillion dollars go? "What trillion dollars," Mr. Obama replies. "I don't know what you're talking about! Are you talking about the new trillion I'm taxing the crap out of you for? Or the old trillion that no one can seem to remember?"

DID YOU KNOW?

A trillion dollars
\$1,000,000,000,000
That's a 12 zeros!

Take **\$100**

A bank's packet of \$100 bills
has **\$10,000**

\$100,000,000

One hundred million dollars
will sit on a standard size pallet

\$1,000,000,000

A Billion Dollars will take 10 pallets

\$1,000,000,000,000

One trillion dollars
= a million million dollars
= a thousand billion dollars
Or
ONE THOUSAND PALLETES

***\$14 trillion in spending is
One billion, four hundred
million of those \$10,000
bank packets***

Gas is soaring to an all time high, closing on \$5.00 a gallon—all a result of his impotent policies here and abroad. Is there no end to this man's fiddling? The solution is to send him and his entourage packing at election time.

Whoever the Republican candidate ends up being, we must all stand behind them. There can only be one commander of an army - we are all an army of voters and our candidate is our General!

If we lose, our lives as we know them will be gone forever. Gone the way of the dodo bird! Gone the way of the South! Gone with the wind!

Well, the old Reb hears the sound of distant cannons. I shall ride to it's source and engage the enemy!

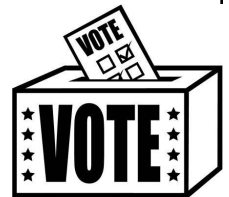

See you on the bridge!

P.S. Did you know we have such an oil surplus in Oklahoma that we have to build another pipeline from here to Texas to disperse it all... but gas prices continue to fly out of sight!

Letters to The Rebel

Do you have a comment or response to The Rebel? Do you have a suggestion for a future news-letter? Do you have a strong opinion about some current affair that you want to speak out about?
