

The Rebel Speaks

GOVERNMENT ANTAGONIST AND HUGUENOT

Never mind retirement! There is NO science behind masks. There is no scientific evidence for mask use for symptomless people. In fact, it really supports the fact that it has no impact in stopping virus spread. The other factor that is important is that covid has a recovery rate of more than 99% and about 95% for the more vulnerable... So why all the hoopla?

What about 6 feet of social distancing? Well, in fact, the World Health Organization recommends one meter (3.3 feet). Several countries say 1.4 meters and 1.5 meters. The CDC says 6 feet, but we have no explanation for the difference in standards. None are based in actual science.

The covid-19 virus is 120 nanometers in size, while the filtration of the ever praised N95 mask is 150—300 nanometers. The filtration in the cheap blue paper masks is even larger, cloth larger even still.

Masks are only affective if they are clean, sterile and dry. As soon as your breath saturates the mask, about 20 minutes, they are no longer functioning. So, are you changing your mask every 20 minutes? Likely not. If you carry a mask that you use over and over, it is riskier than if you wore no mask. This science is proven by simple observation. Michigan,

who has the most draconian mask mandates in the country, has the highest incidence of infection. If masks worked, then theirs would be the lowest. In fact, the lowest infection rates are in the states with the little to no mask mandates.

Increasingly, evidence is proving that long-term mask use actually causes harm—lowered oxygen intake, increased CO2 intake, reduction in blood oxygenation, bacterial and mold buildup. In fact N95 mask reduces oxygen intake by as much as 20% when worn for a long period of time. The other issue, of course, is that if the mask is not worn properly and replaced frequently, it will do nothing to control or stop viral spread.

The continual use of masks is going to cause harm to our immune systems and general health and is not based on any science.

We must demand science based health decisions by our government. NOT fear mongering to enforce compliance.

A compliant population is much easier to control.

P.S. Joe Bite-me, this planet isn't big enough for the two of us! So why don't you kiss off!

MASK NAZI COMPLIANCE OFFICER

**Are you a good party member?
Where is your mask?
Where is your party pin?
Show me your papers!
Where are you coming from?
Where do you live?
Where are you going?
Who have you been talking to?**

**We may have to detain you!
Sign this paper! Come with us peacefully!
We are sending you to a nice place.
You will love it there!**

Feel stupid yet?
