

The Rebel Speaks

GOVERNMENT ANTAGONIST AND HUGUENOT

Well! Can't believe my eyes, but there, in fact, it was. Intimidation by a fascist female police officer of citizens exercising their constitutional and legal right to petition. A group of Americans calling for legalized medical mary-jo. Got a question! If cigarettes kill an estimated 1/2 million smokers and the government ignores it and C.E.O.'s of the big tobacco companies know it, but continue to market and manufacture these poisonous products, isn't that genocide?

We have fought many a dictator and tyrant, and given millions of our children to stop.. exactly that? Tried and hanged for crimes against humanity were the fates of many a tyrant. So, tell me, please, just how many deaths have ever been reported of any using medical mary-jo. I'll answer that for you! Nada! None! No one! Only benefits for those who have been in medical need!

Tobacco, on the other hand, eats out your lungs, your blood vessels, your skin, your heart... the list of destruction to the human body by this poisonous herb goes on and on and on. Where is the fascist cop in the smokers face? "A?" why aren't they trying to intimidate smokers? I grew up with smokers and lived in their pollution and now, in my old age, feel some of the left over effects. It's like standing next to a literal Typhoid Mary, yet no one can seem to stop it! The effects spread to innocent bystanders like plague. It's time to forget the horse and buggy and put both feet firmly in the twenty-first century. After all, we went to the moon when others tried to tell us "what a waist of taxpayer money." Now look at all the good benefits that journey has brought us in the twenty-first century.

I'm for hanging the C.E.O.'s of every major tobacco company in existence, along with any politician or Lie-yer that aided and abetted in the deaths of millions with their addictive nicotine laced poison!

Isn't that why we went to Bagdad? Genocide?

The Reb says support medicine—we need that. Cigarettes we don't need! Sort of like fascist cops, don't need them either!

Time to ride. This old Reb has to go clean his pistol.. Got a feeling I'm going to need it today.

See you on the bridge!

P.S. About the highway patrolman who shot down that man the other day... let me say this. If you or I shot someone down in cold blood in the back, the only question the judge would say is, "Would you like lethal injection or a firing squad?" A man shot another down while running

away, after being caught with his compatriot's burglarizing the first man's house. Being that the man shot was fleeing, the judge determined the dead man posed no more threat and therefore convicted the man who's house was being burglarized of murder.

This man who pulled the trigger still resides in an Oklahoma penal institution! Funny, the judge called it murder. This patrolman committed nothing short of cold blooded, calculated murder!!!! Chances of the patrolman serving time are pretty slim!

P.S.P.S. Coburn leaving office. About damn time! To that flip-flopper, the Reb says, "Bye!" Time to get back to business and try to fix the damage.

What makes a great law enforcement officer?

The traditional answer to that question is...

Education/Training Courage Honor Family Faith

What do you think makes a great law officer?

We salute and honor police officers like:

Tulsa Police Officer Clayton Hicks, who risked his life to pull a teenager from a burning car in February 2014.

Edmond Police officer Lt. Paul Barbour who took the time to write a note to two young girls who were afraid to sleep at night, telling them that he was on patrol and he'd make sure everything was alright.

Rogers County Sheriff Deputy Jerry Smittle, who took the time to increase patrols on a remote dead end country road, to help rid the area of drug dealing neighbors.
